About Me

I am Andreas, I am currently studying DevOps at Lernia Yrkeshögskola. I have previously had internships at Epiroc Drills and ITSY, where I've learnt about everything from large scale software development, to helpdesk support and IT consulting, to cybersecurity. In my spare time I like coding, experimenting with my homelab, and gaming.

Education

 Lernia Yrkeshögskola

2024 - 2026

Studying DevOps, focusing on linux, containers, and cloud technologies.

 NTI Gymnasiet Örebro

2021 - 2024

Studying IT, focusing on development, networking, and servers. I was also part of the student council.

Experience

 ITSY AB

Feb - May 2024

- Spent time with helpdesk, IT consultants, and security specialists.
- Did routine IT tasks, like installing computers and troubleshooting.
- Managed the preparation and delivery of 80 laptops to a client.

 Epiroc Drills AB

Mar - Apr 2023

- Shadowed developers working on different systems of the mining machines.
- Handled the recovery of a critical test server.

Projects

 MT Elservice

I was hired to make a website for a small electrician company. The website has spread awareness and helped the company get several new customers. The website itself is made and hosted using Github Pages.

 Projekt Lazarus

I am currently working for a LARP:ing group, helping to restructure, organize, and modernize their website, making it easier for new members to find the information they need. To make maintenance easier for the group, I am using the CMS they already have; WordPress.
